

Prefabricated insulating tubing bundles

JH-Trace-P series

Application

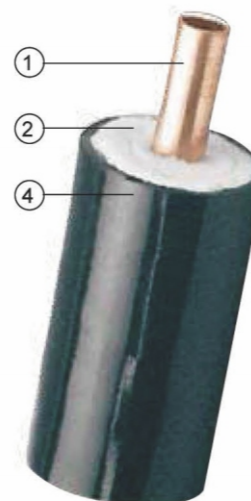

JH-Trace-P series tubing bundle is simple insulation pipe bundle, more suitable for transportation of hot and cold liquids and gas due to transportation on the way, there is no power or steam supply, so this party Type can maximize guarantee the temperature of medium.

JH-Trace-P series tubing bundle is made of customized material Sampling tube, wrapped with non-absorbent fiber glass and heat reflective aluminum foil and outer jacket is of PVC or TPU.

Due to simple structure without electric or steam tracing pipe limits, it can be quickly and conveniently applied in existing cable trays, cable trench, channels, etc. and along with associated terminal sealing accessories, then provide low installation cost.

Product characteristics

- Fast transportation and installation
- Long rolls are cut to avoid the installation waste
- Good weatherproofing

Structure

- 1 Process pipeline
- 2 Glass fiber wool insulation layer
- 3 Heat dissipating aluminum foil (invisible)
- 4 Polymer outer sheath
